EIS000951

JAN 24 2000

Subject: nuclear testing

- 1 [I understand you are planning a test of a nuclear weapon in the next few weeks at Yucca Mt. EIS. I am using this message to tell you of my strong protest of your plan. It will cause harm to the environment, to the Western Shoshone people, and to wildlife there. Please reconsider your plan.]
- 2 [I would prefer that no more nuclear testing be done anywhere, but it seems to me that there is a disproportionate share of nuclear testing, uranium mining and other contaminating activities near Indian reservations. This is clearly environmental racism.]
- 3 [Think of this: More of our own people have died or been sickened as a result of our nuclear weapons program than have been killed in combat with these weapons. There is something wrong, backwards and upside down about these priorities.]

Again, I ask that you cancel these tests. The world is waiting for our leadership. Gretchen Healy
